

DEFENSE CONTRACT ADVISORY · CAPABILITY STATEMENT

Win contracts. Execute them. Recover when performance is at risk.

SDVOSB

SBA VETCERT

24 YEARS U.S. NAVY

AGENTIC DIAGNOSIS

SECRET-ELIGIBLE

CORE COMPETENCIES

Program Health Assessment · Agentic Diagnosis

30-day execution diagnosis across cost, schedule, performance, CPARS, and compliance. AI agents reconcile burn, schedule, and surveillance signals; a credentialed advisor validates every finding.

Contract Performance Recovery & Cure Notice Response

At-risk program stabilization, root-cause analysis, corrective action plans with named owners, and cure-notice / show-cause response built to hold up under government scrutiny.

CPARS Defense & Ratings Protection

QASP reverse-engineering, contractor self-monitoring, and evidence-based narrative preparation under FAR 42.15 to protect ratings and recompute posture.

Proposal Compliance & Evaluation Readiness

Independent color-team review, requirements traceability, and Section M discriminator positioning. AI-accelerated drafting under CFCM-credentialed human oversight.

Contract Margin Recovery

Value-stream mapping and fee-erosion root-cause analysis tied to CLIN structure to recover margin and stabilize cost-control ratings.

FAR/DFARS Compliance & Flowdown Audit

Prime-clause validation, subcontract flowdown integrity, and modification-impact analysis against the executed contract.

DIFFERENTIATORS

- **Built from the government side.** 24 years as the Navy's technical authority on contractor performance — we know what COs document, what CPARS raters weight, and what source-selection boards penalize.
- **Agentic diagnosis.** AI agents watch the signals that precede cure notices and CPARS downgrades continuously; a credentialed advisor owns every judgment. Agents do the watching; the human owns the call.
- **Exposure quantified in dollars.** Findings come with dollar and schedule impact per risk — not a color-coded heat map. You learn what each problem costs.
- **Senior-led; you keep the tools.** No junior staffing. Frameworks, narratives, and workflows we build remain yours to operate — no subscription, no dependency.

RELEVANT EXPERIENCE & DOMAIN KNOWLEDGE

NAVY SURFACE & MAINTENANCE EXECUTION. Surface-combatant and amphibious engineering leadership across LCS, LHD, LPD, and DDG classes; multi-million-dollar shipyard availability execution; government technical authority for SOW compliance and performance documentation through CNO/SRA/DSRA availabilities and INSURV.

ACQUISITION & OVERSIGHT. COR-level contract oversight, proposal evaluation methodology, and FAR/DFARS compliance grounded in a deliberate acquisition credential stack.

TRAINING & DEVELOPMENT. Master Training Specialist and lead instructor; CNO Instructor-of-the-Year nominee; 900+ personnel trained in surface-warfare systems.
